EDUCATION

| | | |
|-------------|--|------------------------|
| 2022 - 2026 | B.Tech at Manipal Institute of Technology | CGPA: 8.18/10.0 |
| 2022 | Class XII Board Exam CBSE | 91.2 % |
| 2020 | Class X Board Exam CBSE | 93.4 % |

TECHNICAL SKILLS

| | |
|--------------------------|---|
| Programming Languages | Proficient: C, C++, HTML, Python, SQL. Familiar: Java, CSS, Javascript, Flutter. |
| Software | Github, AutoCAD, Microsoft Excel, Visual Studio Code. |
| Libraries and Frameworks | Pandas, Matplotlib, Scikit-learn, NumPy, Seaborn, OpenCV, Pillow, MediaPipe, Tkinter, TensorFlow. |

PROJECTS

Fearless: Social Media App to Get Over Your Fears (2024)

Tech Stack: Flutter, Firebase, JavaScript, HTML, CSS

- Sends daily challenges at 00:00 hours using a time-based job scheduler and local push notifications.
- Allows recording and posting videos under 1 minute, compresses to MP4 with AAC, VP8/VP9, and h264.
- Backend: Cloud storage for videos, User DB (user ID, username, email), Posts DB (post ID, video link, likes, comments, timestamp).
- Supports local storage for past video posts, displayed in a calendar view.
- Designed a landing page with 51 pre-registered users.

Sentiment Analysis Dashboard (2023)

Tech Stack: Python, Flask, Hugging Face Transformers, HTML, CSS

- Developed a sentiment analysis dashboard using Flask and Hugging Face Transformers.
- Integrated a trained sentiment analysis model for classifying emotions from text inputs.
- Implemented a user-friendly interface with HTML/CSS for input and displaying sentiment analysis results.

Automated Document Scanner (2024)

Tech Stack: Python, Flask, OpenCV, HTML, CSS, JavaScript, AWS

- Developed a web application to automate document scanning and digitization processes.
- Implemented document detection, edge detection, and perspective transformation using OpenCV.
- Created a user-friendly interface with HTML, CSS, and JavaScript for easy file uploads and displaying processed images.
- Utilized Flask to manage backend logic for image processing and transformations.
- Deployed the application on AWS at for scalability.

COURSE WORK

| | |
|-------------------------|--|
| Computer Science | Data Structures and Algorithms*, Database Management Systems*, Object Oriented Programming*, Operating Systems |
| AI and ML | Introduction to Data Analysis, Artificial Intelligence* |
| Mathematics | Linear Algebra and Logic, Probability And Optimization |

(* courses with laboratory component)

EXPERIENCE

| | |
|---------------------------|--------------------------|
| Research Assistant | October 2023 - July 2024 |
|---------------------------|--------------------------|

- Developed a cost-effective gait analysis solution for initial assessments of mobility issues in rural areas.
- Designed and implemented a user-friendly interface using Tkinter.
- Integrated real-time video processing with OpenCV and pose detection with MediaPipe.
- Conducted numerical angle calculations using NumPy.

| | |
|----------------------------------|-------------------------|
| ISTE Management Committee | August 2023 - June 2024 |
|----------------------------------|-------------------------|

- Organized a multi-day tech fest, AURORA, at our college.
- Featured Mr. Dale Vaz, Former CTO at Swiggy, and Director at Amazon, as the guest speaker.
- Hosted multiple workshops attended by hundreds of students, covering various industry trends.

OTHER

| | |
|------------------------|--|
| Leadership Roles | Class Representative for 3rd and 4th Semester. |
| Technical Achievements | Proficient with five stars in C, C++ and Python on HackerRank . Competitive Rating of 723 on CodeForces . |
| Soft Skills | Problem solving, Team Management, Conflict Resolution. |
